

CASE STUDY

HIGH END COMMERCIAL & RESIDENTIAL CONVERSION

24 EXECUTIVE APARTMENTS – WOKINGHAM

PROJECT OVERVIEW

Consisting of 24 apartments, this development in Wokingham has seen a tired and ageing commercial office block transformed into beautiful executive residences, located conveniently for both local employment and commuter based links to outlying areas. Each apartment comes with its own allocated private parking place.

QUALITY, SHARP & BRIGHT

Fully appointed and with contemporary clean lines throughout, these represent the perfect accommodation desired by professional individuals and couples looking for a stylish home to reflect their lifestyles.

StanLil were instructed to undertake the main contracting role for the combined internal works packages. This entailed both Category A & B fit out works throughout the building and required structural and infill SFS construction.

FULLY APPOINTED & CONTEMPORARY

The demand for a sleek and professional lifestyle environment required StanLil to complete the works with the utmost attention to detail and the very best of craftsmanship and finishes. With floors, walls and ceilings all applied in this manner, the result is a very sharp high end decorative finish.

Externally; the render, cladding and glazing design have giving the building a modern twist on an art-deco look and feel.
